

## 2-7 Interpreting Context Graphs

Name \_\_\_\_\_ Per. \_\_\_\_

At 11 o'clock, Michelle's mother sends her to the corner store for milk and tells her to be back in 30 minutes. Examine the graph and use it to answer the questions below.

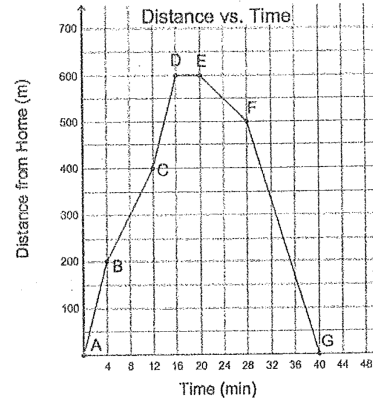

- Over what interval(s) of time is Michelle traveling the fastest?
  - the slowest? (compare steepness, not direction)
- How long did it take Michelle to reach the store? How do you know?
  - How long did Michelle stay at the store? How is this shown on the graph?
  - How long did it take Michelle to get home from the store?
- Using the information the graph provides, write a story that describes Michelle's trip to the store and back.
