

6-1 Vertical Angles

Name _____ Per. ____

1. Which angles are VERTICAL ANGLES? (Mark them with an "arc" or a "double arc".)

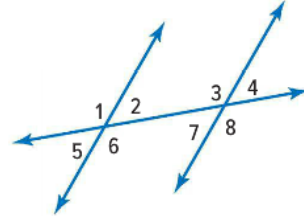

2. If angle $1 = (80 + 5x)^\circ$ and angle $6 = (20x + 5)^\circ$, what is the value of x ?

3. Based on what you got for x , what is the measurement of angles 1 and 6?
