

6-2 Corresponding Angles

Name _____ Per. ____

1. Which angles are CORRESPONDING ANGLES? (Mark them with an "arc" or a "double arc".)

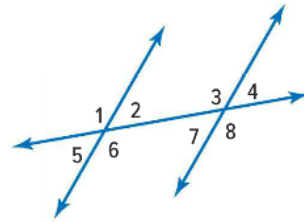

2. If angle 2 = $6(x - 4)^\circ$ and angle 4 = $(5x - 13)^\circ$, what is the value of x?

3. Based on what you got for x, what is the measurement of angles 2 and 4?
